THE BLUEPRINT PREVIEW

From Paper Trading To Your First Payout — The Roadmap

The six-phase path from zero to a funded, paid-out trading account. This preview shows you the map. The complete phase-by-phase execution — instrument selection, backtesting rules, the full LucidFlex breakdown, and the week-by-week timeline — is inside the Inner Circle mentorship.

6-PHASE OVERVIEW · PREVIEW EDITION

SECTION 01

THE PHILOSOPHY BEHIND THE BLUEPRINT

Why the least desperate traders win

THE CORE IDEA

"The less you need trading to succeed, the easier it is to succeed at trading." When your financial survival depends on your next trade, every loss hits differently. Your rules bend. Revenge trades happen. Accounts blow up.

The blueprint in this course is built on how trading success actually happens for people who are not trying to escape their life through trading — who are excelling elsewhere and trading on the side, with money they do not desperately need. The result: they stop caring about individual trades, follow their rules because there is no emotional pressure not to, and their positive EV system pays out exactly as the math says it will.

The Six-Phase Blueprint at a Glance

#	PHASE	GOAL
1	Build Your Foundation	Study, backtest, and find your actual edge
2	Paper Trade Like It Is Real	Treat simulated money with real discipline
3	Collect Your Own Data	Build a journal, calculate your real EV
4	Buy Your First Prop Account	One payment, no subscription
5	Pass the Evaluation	Trade your system, follow the rules, hit the target
6	Take Your First Payout Immediately	Remove the weight. Prove it is real.

SECTION 02

THE SHAPE OF EACH PHASE

What each stage involves — overview only

Each phase of the blueprint has a specific objective, a minimum bar to clear before advancing, and a set of execution rules that keep you from skipping ahead. This preview outlines the shape of the journey. The exact backtesting checklist, the recommended starting instruments, the full prop-firm rule breakdown, and the eval execution rules are covered step-by-step in the complete course.

Foundation — one market, one setup, one timeframe, backtested to a proven positive EV.

Paper Trading — a minimum-length simulation run treated with real-money discipline.

Data Collection — a structured journal that turns "I think it works" into "I know it works."

Funded Account — a low-cost, one-time-fee evaluation account sized so losing it does not break your psychology.

The Evaluation — executing your proven system, unchanged, inside the funded environment.

The First Payout — the exact moment that converts belief into certainty.

WHERE THE EXECUTION DETAIL LIVES

A roadmap without mile markers does not get you anywhere. The complete instrument comparison table, the five-question backtest checklist, the full prop-firm rule breakdown (profit target, drawdown rules, consistency rule, payout speed), the eval execution rules, and the week-by-week timeline are inside

READY TO SEE THE FULL PATH?

This preview showed you the six phases. [Click here](#) gives you the exact execution: instrument selection, the backtest checklist, paper-trading protocol, the full funded-account rule breakdown, evaluation execution rules, and a week-by-week timeline from day one to your first payout — plus direct access to Jay's private mentorship channel.
